TAJIMA ORIGINAL OPTIONAL PARTS

Seed Bead Device

Automatic Color Changing Seed Bead Embroidery Device

Complex Seed Bead application automated with embroidery technology

A high sewing speed and uniformity realize overwhelming productivity, while the mechanisms that can sew up to 4 colors with one embroidery head create higher added value.

Max. RPM : 800 (Max.400 beads per minute)

• About glass beads

The brilliant shine of the glass beads adds an interesting uniqueness to finished products.

Seed Bead Device

Optimal cost balance by combining embroidery and beads according to the product

Since embroidery and beading can be performed in one process, it contributes to the production of high value-added products mixing embroidery with beads.

It is also possible to make motifs using just multi-colored beads.

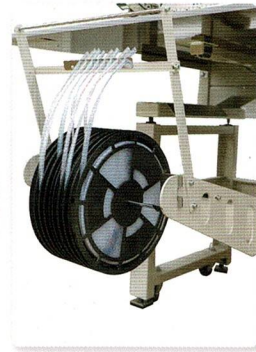

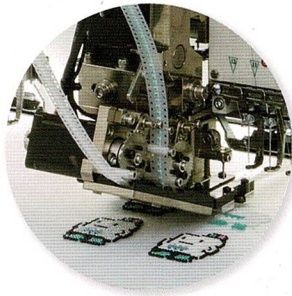

TAJIMA DG16 Seed Bead Tool (optional)

By using the Seed Bead Tool of TAJIMA DG16(optional), it is possible to create bead design data easily while checking the same bead arrangement on the screen.

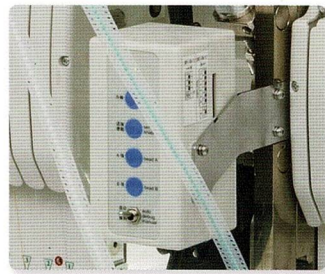

Special bead tape reels are used to facilitate changing

Seed Beads are individually enclosed in a special tape reel, this is what makes bead sewing possible. Also, as the Seed Bead tape reel can be easily changed, multi-colored bead motifs can be easily created. The Reel Stand that holds replacement Seed Bead reels is also available as an option for single-head machines.

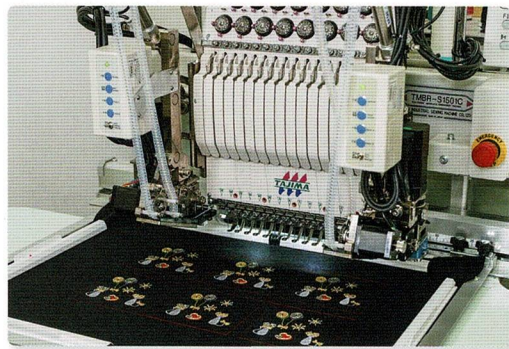

Easy Operation

Anyone can operate it easily. There is a switch for each left and right Seed Bead devices so that the unit can be moved up and down and the beads can be fed in front of each embroidery head.

Example : Seed Bead device for L and R side

By providing a switch for the left and right Seed Bead device, each device can be moved up and down and the beads can be fed from the front of each embroidery head.
